

Education Solutions

LUMOplay with any projector, a Windows computer, and a 3D camera.

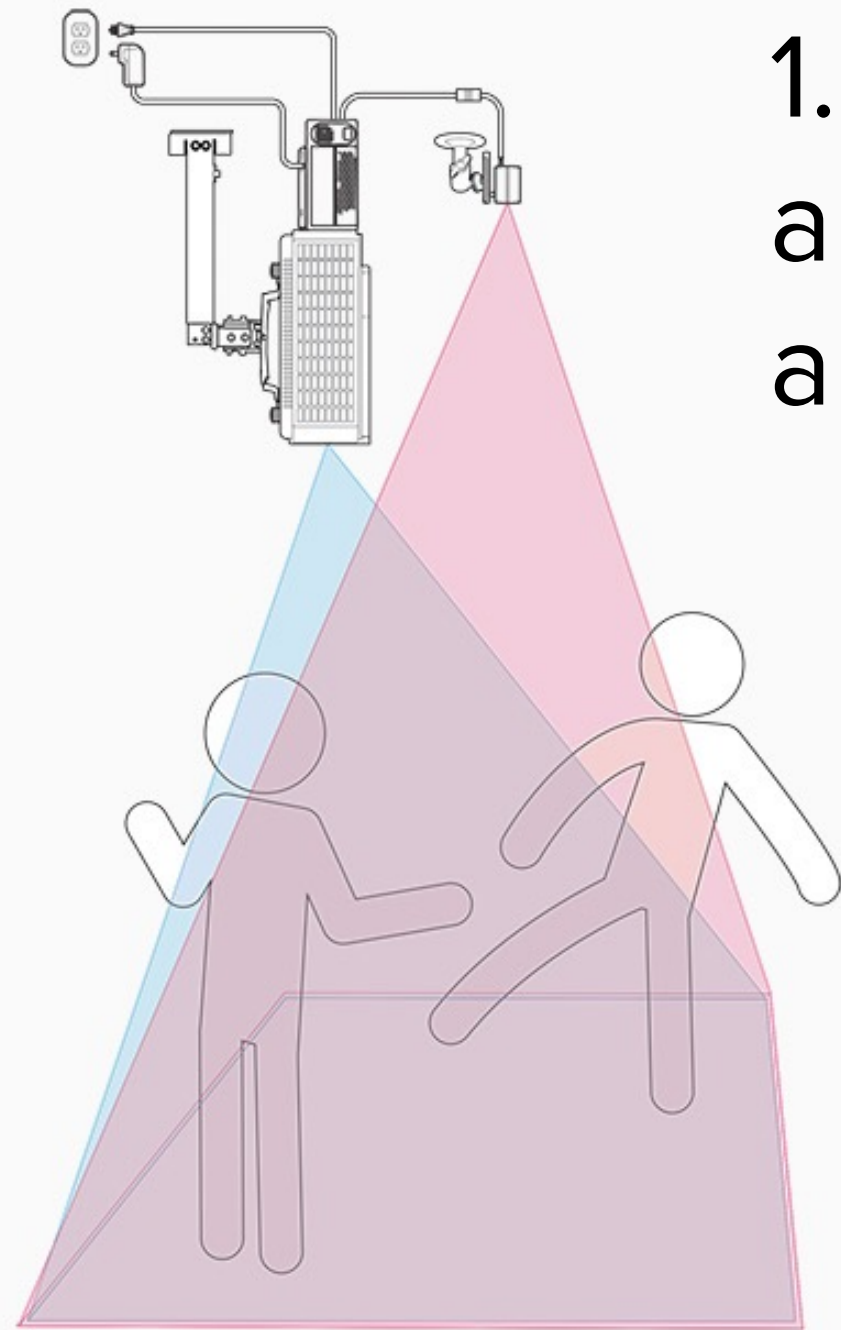

You can use equipment your school already has, source what you need locally or online, or buy a kit from one of our partners!

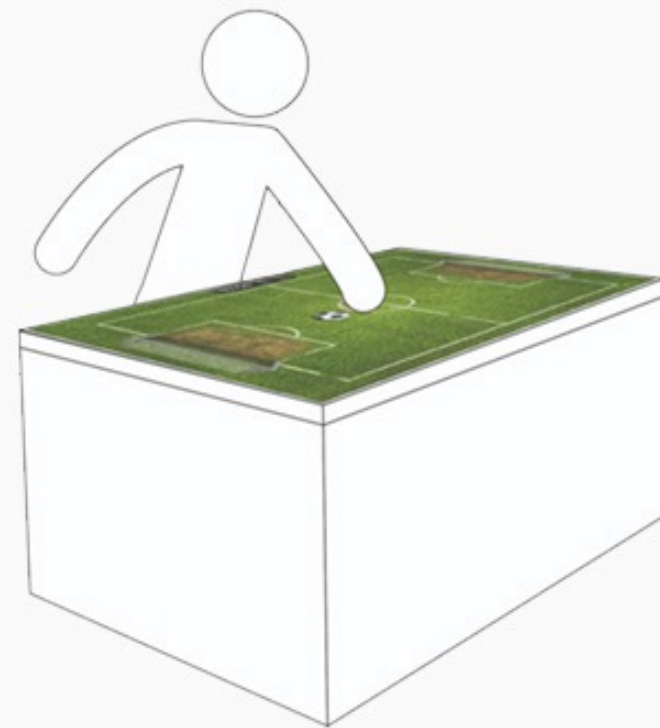

Let us know if you want to recommend a partner in your area.

LUMO Interactive makes it easy
to create an interactive floor or wall.

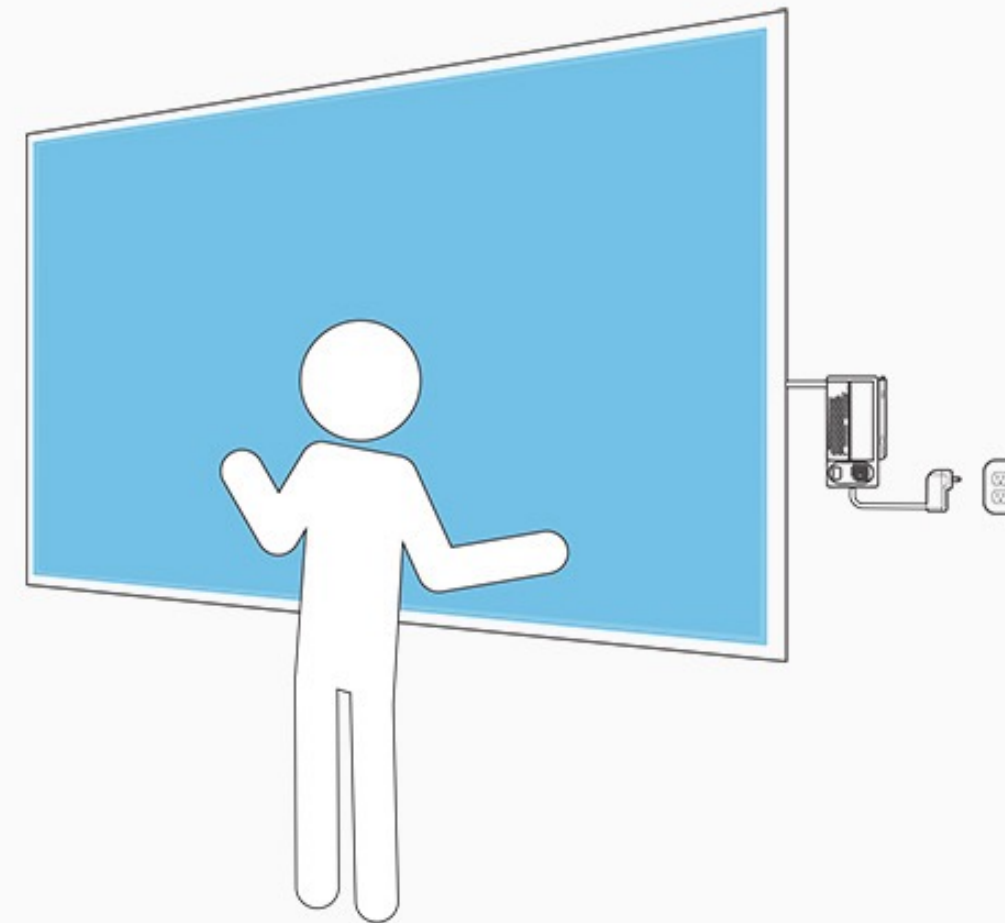

How it works

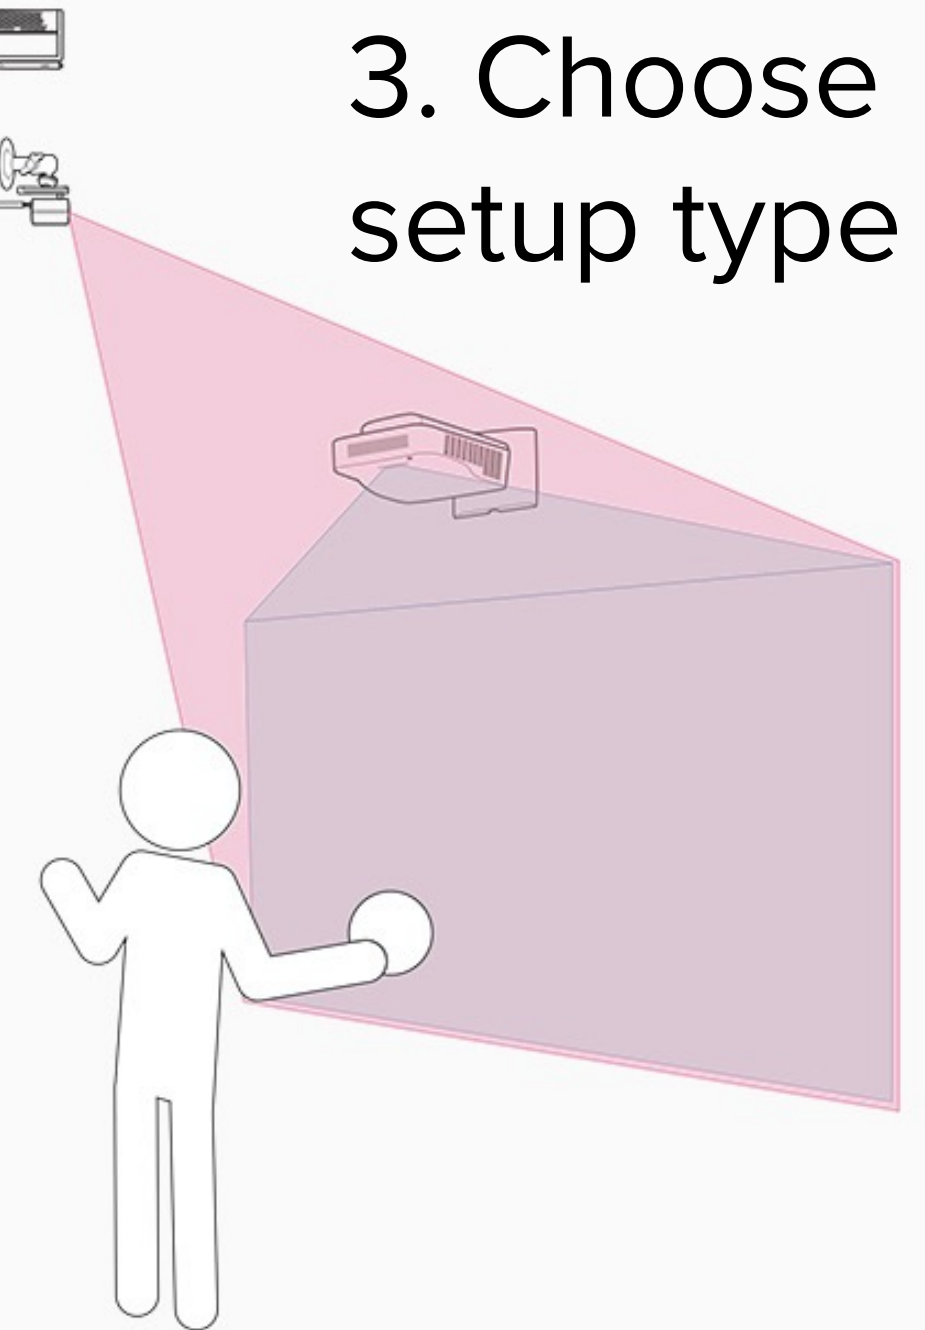

1. Connect a computer and camera to any digital display

2. Install LUMOplay

3. Choose setup type

4. Start playing!

Fast Support

We use LUMOplay ourselves,
so we care that it works!

7 reasons why LUMO is needed for your education customers

- Touch-free experiences are in demand more than ever before
- Education through interactive engagement is a high priority among teachers
- Interactive projection is a popular and effective treatment for neurodiverse children
- LUMO's Motion Maker system is code-free, and an ideal early intro to STEM activities
- LUMO hardware kits offer a full range of display options, from small classroom solutions to gym and recreation room activities
- LUMO includes over 300 apps, with tools for teachers to create their own apps and courses
- No special installation skills are required to install LUMOpay – any local audio-visual company or internal IT department can install a system, usually in under an hour

Take the following tour.

See what LUMO can do.

Over 300 apps
& experiences
for floors,
walls, tables &
more.

Create safe,
imaginative
spaces.

Encourage
creativity, social
skills, role
playing, and
physical activity.

Set up in under
an hour. No
special training
required.

Apps, games,
and creation
tools for
students
aged 2 and up

Multiplayer apps
improve social
skills.

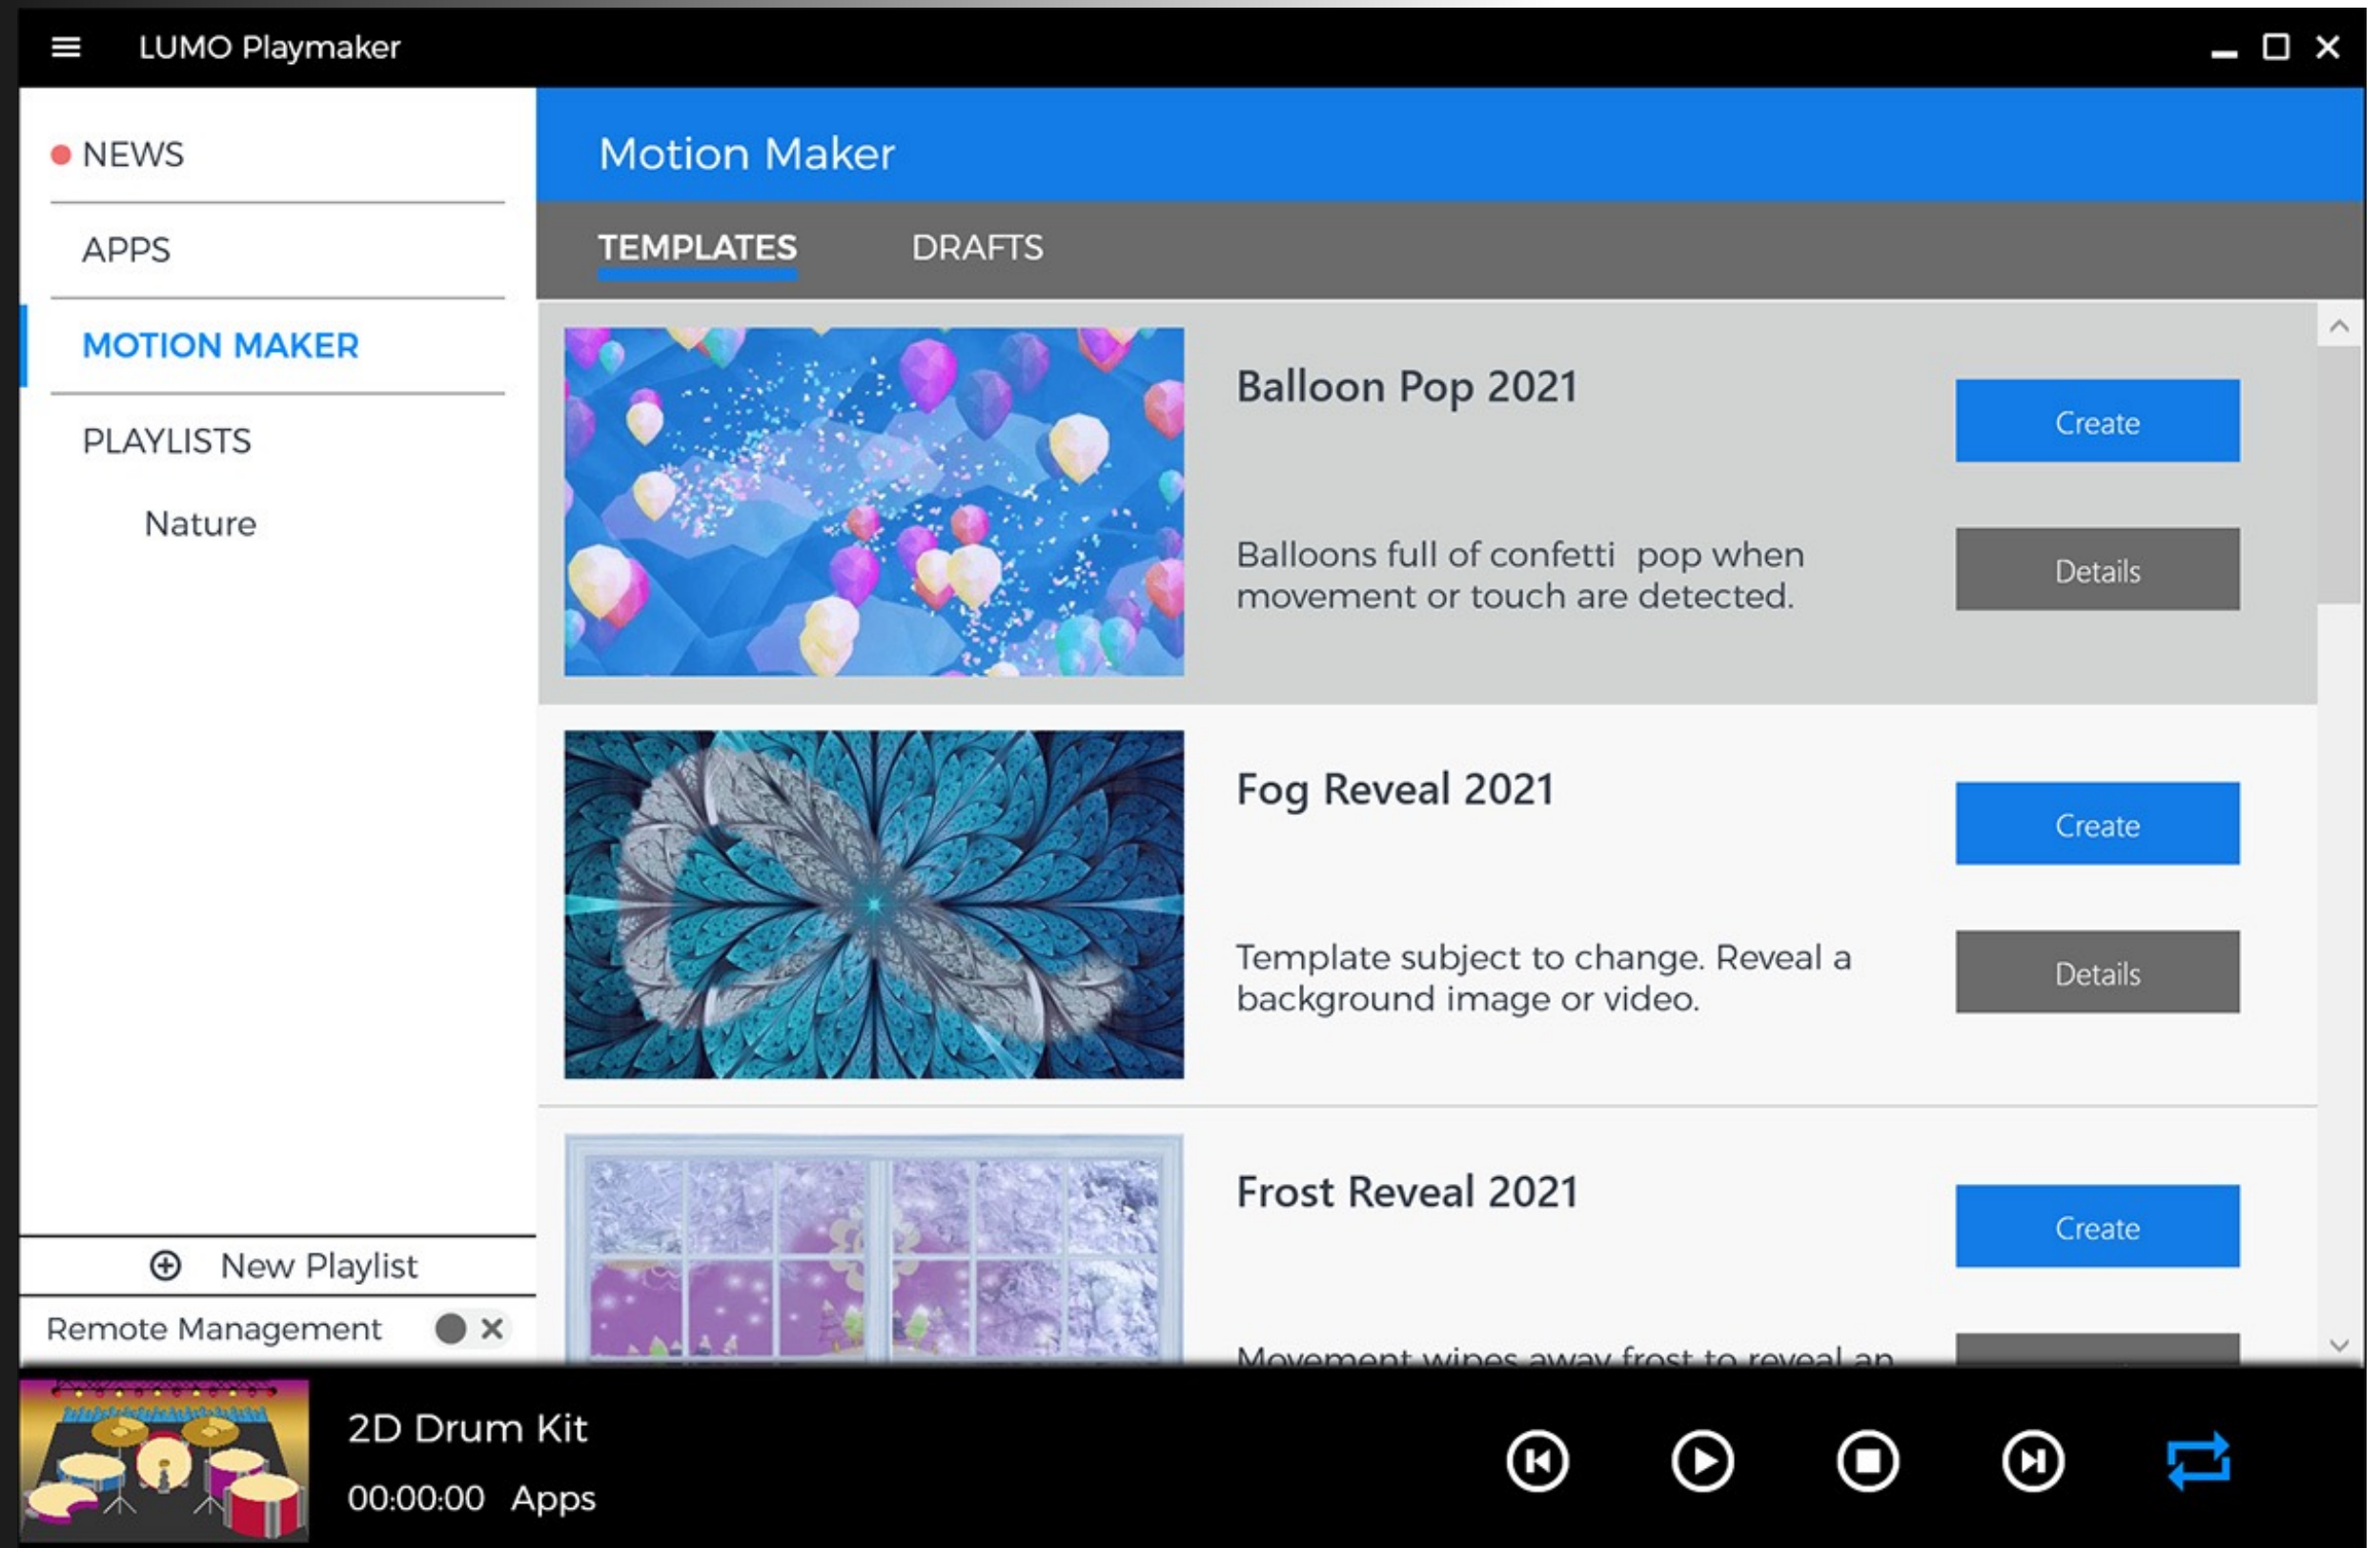

Encourage kinetic learning and problem solving.

Engage special
needs and
medically fragile
children with
sensory apps.

Includes game design tools for teachers & students!

“LUMO Interactive keeps my students’ attention in a way that sitting behind a desk never could.”

Tanya, Collingwood Day School
